

Voters, and Parents, Favor Having Police in Schools to Provide Security, and Are Willing to Pay for Building Security Improvements

*Do you think it is a good idea or bad idea to have police officers in schools to provide security?**

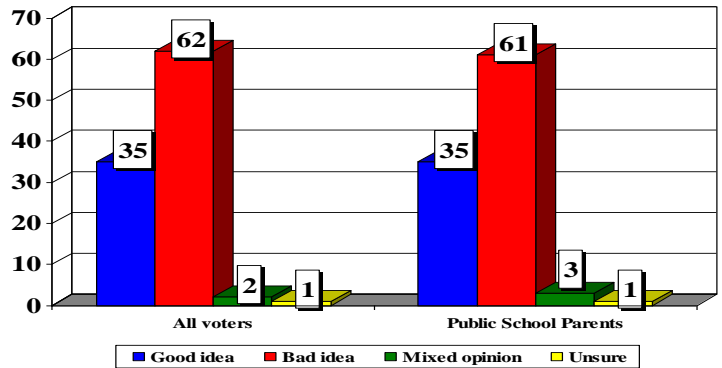

** Differences in responses between parents and non-parents were not statistically-significant for this question*

Generally speaking, if the county public school system that serves your community asked for a small property tax increase to provide more school security systems, such as electronic cameras, alarms and monitoring equipment, would you vote for or against it?

*Do you think it is a good idea or bad idea to allow teachers who receive proper training to carry concealed firearms while they are at school?**

** Differences in responses between parents and non-parents were not statistically-significant for this question*

Methods

Please note that these survey questions were not funded or commissioned by any organization or committee, nor was Florida Opinion Research retained by any parties of interest in this matter, in any capacity. This survey research data was gathered through telephone interviews that specially-trained interviewers conducted with 800 randomly-selected registered voters in the State of Florida, who had valid residential or cellular telephone numbers. The interviews were performed during the period of February 19, 2013 through February 22, 2013. The overall estimated margin of sampling error is +/- 3.46%, based on a confidence level of 95%, although it varies for each individual question. This means that if this survey was repeated, 95 times out of 100 the results would be within plus or minus 3.46% of those provided herein. Adjustments were made to weight the results toward demographic and geographic characteristics of the state's electorate, in order to account for under- and over-sampling that normally occurs as a result of the random selection process, and to ensure that all major sub-groups are represented in proportion to their actual percentages. Like all polls, this opinion survey research is subject to other possible sources of error, such as unintentional bias in the wording of questions, data-entry error and nonresponse bias.
